

MUH. RAFIANTO

Junior Full-Stack Developer

Makassar, Indonesia (UTC+8) | Open to Remote Work | mr.rafianto@gmail.com | +62 823-4977-2845
GitHub: github.com/Ertreiter | Portfolio: ertreiter.github.io/Ertreiter | LinkedIn: linkedin.com/in/muh-rafianto-688267279

PROFESSIONAL SUMMARY

Informatics Engineering graduate (GPA 3.86/4.00) and full-stack developer with 2+ years of hands-on experience building web applications with the MERN stack (MongoDB, Express.js, React, Node.js), Next.js, Python/Flask, and PHP/Laravel, plus Android development in Kotlin. Currently building and maintaining internal web platforms and dashboards as primary system owner at PT Aptana Citra Solusindo; previously delivered web solutions for 3+ MSME clients and an IoT monitoring dashboard for airport operations. Experienced with REST APIs, JWT authentication, SQL and NoSQL databases, Git/GitHub, Docker, and deployment on Vercel. C1/C2 English (EF SET 90) and comfortable working remotely and independently.

TECHNICAL SKILLS

Languages: JavaScript | TypeScript | Python | PHP | Kotlin | SQL | HTML5 | CSS3 | Solidity

Frontend: React.js | Next.js | Vite | Tailwind CSS | Responsive Web Design

Backend & APIs: Node.js | Express.js | Flask | Laravel | REST API Development & Integration | JWT Authentication | Postman

Databases: MongoDB | MySQL | PostgreSQL (Supabase) | Firebase

Tools & Deployment: Git | GitHub | Docker | Vercel | Figma | VS Code

Mobile: Android Native (Kotlin, Jetpack Compose, MVVM, MVI)

Blockchain: Solidity | Hardhat | Web3.js | Ethers.js | MetaMask Integration | Polygon | Zero-Knowledge Proofs (Plonky3)

Practices: SDLC | Agile Collaboration | Debugging & Root-Cause Analysis | System Testing | UAT | AI-Assisted Code Review | Technical Documentation

Languages (Spoken): English: EF SET Quick Check 90 (C1/C2 Advanced), Pre-TOEFL 560 | Indonesian

PROFESSIONAL EXPERIENCE

Intern, People Development Officer (IT) — MagangHub Batch 2

Sep 2026 – Present

PT Aptana Citra Solusindo

- Built the NEOP (New Employee Orientation Program) dashboard and onboarding/training platform using React, Vite, and Node.js to support company-wide employee development.
- Developing an incentive management dashboard with Python and Flask, based on analysis of HRGA (HR & General Affairs) operational needs.
- Deployed an inventory dashboard and a freelance agreement management system for branch offices, streamlining data tracking and documentation across locations.
- Serve as primary system owner for end-to-end development, deployment, and maintenance of HRGA systems; manage code with Git and GitHub (private company repositories).

Freelance Full-Stack Developer & System Analyst

2022 – Present

Remote

- Developed responsive web solutions for 3+ MSME clients, including PHP/Laravel business systems for internal business use; gathered and validated functional and technical requirements and translated them into working web applications.
- Managed the full Software Development Life Cycle: system design, development, stakeholder clarification, User Acceptance Testing (UAT), maintenance, and performance optimization.

Intern, Airport Technology Division

Jun 2025 – Jul 2025

PT Angkasa Pura Indonesia (InJourney Group) — Makassar, Indonesia

- Designed and deployed an end-to-end IoT monitoring architecture with a real-time dashboard now used in daily airport operations, collaborating with cross-functional stakeholders.
- Conducted system testing, implementation, and post-implementation support; troubleshoot technical issues across critical IT infrastructure with senior engineers.

Head of Technical Department

2025

Developer Student Club, Universitas Muslim Indonesia — Makassar, Indonesia

- Led the technical department in a team of 40+ members, managing multiple concurrent projects across 4 strategic divisions with defined process flows and functional guidelines.

Freelance Data Annotator

Feb 2026 – Present

Remotasks — Remote

- Labeled and validated datasets to support AI model training, working independently in a remote setting.

Intern, Administrative & Network Support

Jan 2021 – Apr 2021

PT Telekomunikasi Indonesia — Makassar, Indonesia

- Maintained customer and technician records and supported network infrastructure maintenance (server, ODC, ODP, fiber-optic) for field operations.

KEY PROJECTS

Our Indonesia Voice — Web3 Crowdsourcing Platform (MERN)

2025

React.js, Node.js, Express.js, MongoDB, Solidity, Web3.js, MetaMask, Lisk Sepolia testnet, Vercel | GitHub:

Ertreiter/Our-Indonesia-Voice

- Built a full-stack platform where contributors record Indonesian voice samples for AI training data, verify each other's submissions through a double-blind consensus, and receive automatic rewards via smart contracts. Live demo deployed on Vercel.

Financial-HQ — Finance & Admin Dashboard

2025

Next.js, React, Supabase Auth, PostgreSQL, Vercel

- Built a web-based finance and administration dashboard with authenticated login, transaction management, reporting, and data visualization. Live demo deployed on Vercel.

CodiLeap — Gamified Programming Learning App (Bangkit Capstone)

2024

Kotlin, Android, JWT Authentication, Team Collaboration, Git/GitHub | GitHub: manikandareas/CodiLeap (team repository)

- Developed the Android frontend of a Duolingo-style app for learning programming languages and contributed to backend development, including JWT authentication, as part of a collaborative capstone team in Google Bangkit Academy (Dicoding Academy).

Digital Identity System (Thesis) — Android & Blockchain

2025

Kotlin, Zero-Knowledge Proofs (Plonky3), Solidity, MetaMask, Polygon Amoy testnet

- Architected a serverless Android application that generates Zero-Knowledge Proofs on-device and interacts directly with smart contracts on Polygon with MetaMask wallet integration, removing backend dependency and reducing latency; published as a journal article (RABIT, Universitas Abdurrah).

EDUCATION

Universitas Muslim Indonesia — Makassar, Indonesia

Aug 2022 – Feb 2026

Bachelor of Informatics Engineering; GPA: 3.86/4.00

SMK Darussalam Makassar — Makassar, Indonesia

Graduated 2022

Vocational High School Diploma, Software Engineering

CERTIFICATIONS & LEADERSHIP

- Google Bangkit Academy 2024 — Selected for a competitive national career-readiness program (acceptance rate <10%), focused on technical execution and project management.
- Dicoding Academy Certifications: Kotlin Programming; Android Beginner; Android Fundamental; Android Intermediate; Machine Learning for Android.
- Core Team Member, Android & Multiplatform Division — Google Developer Student Club (GDSC), Universitas Muslim Indonesia (2023–2024).
